bareMinerals - Tutorials Foiled Eye

Product ID: 25215

Light up your eyes like jewels with The Foiled Eye.

With this bareMinerals Tutorials Kit, we provide the shades, tools and instruction for Bare Escentuals' signature "foiling" eye technique for creating a brilliant, high-sheen effect. Applying bareMinerals wet (i.e. "foiling") gives them a lustrous, light-reflective glow that represents bareMinerals beauty at its most naturally glamorous.

The two shades selected for this collection create a gradation of shine from a soft and subtle sheen to deeply sultry, framing the eyes to create an oh-so-sexy-stare. Not only does the kit provide versatile shades-great wet or dry-but we have designed a NEW double-ended brush specifically developed for foiling bareMinerals. Just follow our simple instructions on the detachable tip card for several different foiled looks. With Tutorials, you'll learn at home all the beauty lessons they didn't teach in school.
